ClearOne

AUDIO CONFERENCING SOLUTIONS GUIDE

February 2007
AMERICAS

Seems like practically every other conference call ends with the phrase “Sounds Good to Me.” They must be using ClearOne.

Who Is ClearOne Communications?

We are a leading provider of high performance audio conferencing solutions. We introduced our first professional audio conferencing products to the market in 1990 under the brand name Gentner. Since that time, we have expanded and diversified our product line to meet all types of audio conferencing needs, from personal conferencing on PCs and cell phones, to office desktop conferencing, to large group conferencing venues such as boardrooms, training centers, courtrooms and auditoriums.

WHY GET TO KNOW US?

In addition to our professional systems, we offer a comprehensive line of personal, tabletop and premium audio conferencing products. We are committed to providing the highest quality audio for any conferencing environment. Our latest product releases include the Chat™ 50 personal speaker phone, which enables hands-free audio conferencing in a wide variety of settings, the Chat™ 150 group speaker phone, which replaces the low quality speakerphones in enterprise handsets and web & video conferencing systems, and the Converge Pro series of next-generation professional audio conferencing products, which will eventually replace the current XAP line.

With more than 80,000 professional systems sold, ClearOne has earned a reputation as the industry leader in professional audio conferencing and an innovator in the overall audio conferencing market. Recognizing our customer-focused and forward-looking product strategy, the independent growth-consulting firm Frost & Sullivan presented us with its 2006 Product Line Strategy Award. ClearOne customers include businesses of every size and type, including finance, education, healthcare, manufacturing, and government institutions.

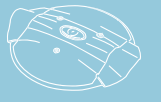
ClearOne®

ClearOne Conferencing Products

PERSONAL CONFERENCING - PG 2
The Chat™ 50 personal speaker phone is a mobile audio peripheral that connects to a wide variety of devices and provides crystal-clear, hands-free audio communications and audio playback. The Chat™ 150 group speaker phone is a perfect fit for individuals or small groups, and connects to telephones, PCs, and video conferencing systems.

TABLETOP CONFERENCING - PG 12
MAX® wired and wireless tabletop conference phones deliver the full, rich sound quality you've come to expect from the leader in professional conferencing. They are extremely easy to use and offer unprecedented expansion capabilities by linking multiple phones for outstanding full-room coverage.

PREMIUM CONFERENCING - PG 20
RAV™ conferencing systems feature sophisticated technologies from ClearOne's industry-leading professional conferencing products to deliver remarkable sound quality. Plus they're as easy to use as a tabletop conference phone and interface with any video or web conferencing system.



CONFERENCING MICROPHONES - PG 26
The ClearOne AccuMic products deliver significantly enhanced audio performance for web and video conferencing.

PROFESSIONAL CONFERENCING - PG 32
The new Converge™ Pro series of next-generation professional audio conferencing products take the industry-leading XAP® platform to new levels of unmatched audio performance, flexibility, and configuration simplicity. Along with the Converge 560/590, ClearOne offers the most complete professional audio conferencing product line in the industry.

CONFERENCING FURNITURE - PG 41
ClearOne offers a full line of durable monitor and AV carts.

ClearOne®

ClearOne Technology .01

DISTRIBUTED ECHO CANCELLATION®

One of the challenges in delivering good sound quality during a conference call is eliminating acoustical echo. Acoustical echo results when sound from the far-end phone device is sent into the local conference room, where it is picked up by the microphones on the conference phone and then sent back to the far-end phone device. Because of this process, far-end participants hear their voice echoed as they speak. Distributed Echo Cancellation from ClearOne solves this problem. By assigning an acoustical echo canceller to each microphone, the echo canceller identifies the sound that would otherwise be returned to the far end as echo and eliminates it. ClearOne was the first to introduce Distributed Echo Cancellation in 1998, incorporate it into every audio conferencing system, and is the worldwide leader in this technology.

PERSONAL CONFERENCING

CHAT™

The Chat speaker phone products provide unmatched full-duplex audio clarity and connect to a wide variety of devices for conferencing wherever and whenever you need it.

Over 100 million people are estimated to now be using their PC as a phone. That's a lot of people that need a Chat 50.

The Chat 50 is a mobile audio peripheral that connects to a variety of devices and provides crystal-clear, hands-free audio communications. With unmatched full-duplex capability, users can simultaneously speak and listen without audio cutting in and out. The Chat 50 also delivers rich audio playback for music, gaming and other sound files.

CHAT™ 50 USB › NEW
The industry's first true full-duplex personal conferencing device. It connects to PCs and laptops, telephones, cell phones, desktop video conferencing systems, and MP3 players for remarkably clear audio communications and playback. It delivers full-bandwidth frequency response for rich, full audio with unmatched full-duplex performance. Includes Chat 50 personal speaker phone, USB cable, quick start guide, CD. Separate cables required for non-USB connections.

CHAT™ 50 USB PLUS › NEW
A Chat 50 bundle with accessories for cell phones and some telephones. This bundle includes the Chat 50 personal speaker phone, USB cable, cell phone and telephone audio cable (2.5mm-3.5mm), power adapter, quick start guide, CD.

CHAT™ 50 USB PLUS INTERNATIONAL › NEW
A Chat 50 bundle with accessories for cell phones and some telephones, including an international power supply. This bundle includes the Chat 50 personal speaker phone, USB cable, cell phone and telephone audio cable (2.5mm-3.5mm), power adapter with international power clips (US, Europe, UK, Australia), quick start guide, CD.

CHAT™ 50 GLOBAL TRAVELER › NEW
A Chat 50 bundle with accessories for cell phones and some telephones, including an international power supply. This bundle includes the Chat 50 personal speaker phone, USB cable, cell phone and telephone audio cable (2.5mm-3.5mm), power adapter with international power clips (US, Europe, UK, Australia), travel case, MP3 player audio cable, quick start guide, CD.

CHAT 50 USAGE PROFILES

INTERNET TELEPHONY	Skype, Vonage, Google Talk, others
ENTERPRISE TELEPHONES	Avaya, Cisco, Inter-Tel (connectivity limited to certain models)
VOIP SOFTPHONES	Avaya, Cisco, Nortel
CELL PHONES	Motorola, Nokia
WEB CONFERENCING	IBM Workplace, Microsoft Live Meeting, WebEx
INSTANT MESSENGER	AOL, Microsoft MSN, Yahoo
DESKTOP VIDEO CONFERENCING	Polycom, Sony, Tandberg
AUDIO PLAYBACK	iPod, QuickTime, RealPlayer, Windows Media Player
PC-BASED GAMING	TeamSpeak

CHAT 50 CONFIGURATIONS

The Chat 50 comes in multiple bundled configurations to allow users to choose the accessories they want included. Also, cables and other accessories are available separately to customize the Chat 50 to exact needs.

CHAT 50 Avaya telephone audio cable (3.5mm to RJ-9)
830-159-009

Tired of huddling around your office telephone and shouting at the people on the far end of the call? Read on for a much better solution.

The Chat 150 connects to telephones, PCs, and video conferencing systems for rich, full-duplex audio communications. It provides speaker phone capability that is far superior to the built-in options on these devices. A perfect addition to the office or conference room for greatly enhanced collaboration.

CHAT™ 150 FOR ENTERPRISE TELEPHONES › NEW

Connects to leading enterprise telephone handsets. Allows user to utilize functions of phone but enjoy business-class audio conferencing performance. Eliminates need to install additional lines - utilizes whatever line type (analog, digital, VoIP) the phone is connected to—just plug into existing phone and use. Includes breakout box that allows users to switch between speaker mode and privacy mode with a headset. Also includes USB port for connecting to a PC.

*Note: connectivity to telephone handsets is limited to specific models due to variations in the headset jack that the Chat 150 connects to.

CHAT™ 150 USB › NEW

Connects via USB to PCs for superior wideband audio performance for VoIP softphones & internet telephony, web-based video conferencing, instant messaging, and any other audio-based applications.

CHAT™ 150 VC › NEW

Connects to video conferencing systems, both installed and set-top. Provides greatly enhanced audio performance for small groups, delivering 360-degree mic pickup and crystal-clear audio from the far end. Also includes USB port for connecting to a PC.

CHAT 150 USAGE PROFILES

INTERNET TELEPHONY	Skype, Vonage, Google Talk, others
ENTERPRISE TELEPHONES	Avaya, Cisco, others (connectivity limited to certain models)
VOIP SOFTPHONES	Avaya, Cisco, Nortel
WEB CONFERENCING	IBM Workplace, Microsoft Live Meeting, WebEx
INSTANT MESSENGER	AOL, Microsoft MSN, Yahoo
VIDEO CONFERENCING	Polycom, Sony, Tandberg
AUDIO PLAYBACK	QuickTime, RealPlayer, Windows Media Player

CHAT 150 CONFIGURATIONS

The Chat 150 comes in three versions, allowing users to connect to enterprise telephones, PCs, and video conferencing systems. All systems have a USB port for connectivity to a PC. The telephone SKUs vary by phone manufacturer because the breakout boxes that connect the Chat 150 to the phone are tailored to the specific requirements of the phone.

ClearOne Technology .02

CLEAREFFECT™

(Available on RAV and MAX) The vast majority of conference calls are conducted using narrow-band telephony signals, which eliminate the high and low tones from participants' voices. This causes listener fatigue due to participants straining to hear what is being said. ClearEffect creates natural, full-sounding audio by simulating the high and low tones that were eliminated by the narrow-band signal. The result is similar to moving from a clock radio to a boom box.

TABLETOP CONFERENCING

MAX®

ClearOne MAX conference phones deliver rich, full-duplex audio with the unique capability of daisy-chaining multiple phones together.

Business people average hundreds of conference calls per year. Are your ideas being clearly heard?

The MAX family delivers unprecedented expansion capabilities. Instead of only providing expansion microphones, MAX offers multiple linked phones, each with microphones, loudspeakers, and controls for outstanding full-room coverage. No matter where participants are seated, conversations are natural and effortless. Another innovation first from ClearOne.

MAXAttach™

The only fully expandable analog conferencing phone system. It comes with two phones, for greater coverage in larger conference rooms, and can also be expanded to up to four daisy-chained phones using the MAX EX Expansion Kit. Additionally, the two phones can be used in separate rooms with the purchase of an extra power supply base unit.

MAX EX

A single-unit analog conference phone, perfect for executive offices and small conference rooms. It can be daisy-chained with as many as three additional MAX phones for use in larger conference rooms with the MAX EX Expansion Kit.

MAXAttach Wireless

An industry first in conferencing technology. MAXAttach Wireless comes with two analog phones that wirelessly connect to a single base unit, providing expanded coverage in medium-sized rooms.

MAX Wireless

The industry's first wireless analog conference phone. It offers the audio quality of MAX EX without power or telephone cables, turning any room into a conference room. It comes with a single wireless conference phone that can be used anywhere within 150 feet of the base unit.

MAXAttach IP™ › **NEW**

The industry's first fully expandable SIP-based VoIP tabletop conference phone system. MAXAttach IP comes with two phones, for greater coverage in larger conference rooms. It can also be expanded to up to four linked phones with the MAX IP Expansion Kit to provide outstanding coverage for large rooms and U-shaped table configurations. Also, the two phones can be used in separate rooms with the purchase of an extra power supply base unit.

MAX IP™ › **NEW**

The industry's first fully expandable SIP-based VoIP tabletop conference phone. The MAX IP audio conferencing phone delivers unrivaled audio clarity and room coverage for your VoIP phone system. With ClearOne's sophisticated audio processing technologies, advanced SIP features, and the ability to daisy chain up to four phones, MAX IP delivers outstanding audio conferencing value.

TABLE DIAGRAMS

The recommended distance between the phone units and each participant is between 3 and 8 feet, depending on room conditions. Background noise, reflective hard surfaces and the number of participants may affect the pick-up range.

MAXAttach Wireless	• Medium-sized conference rooms • Rooms without phone lines within 150 feet of base unit

Tabletop

ClearOne Technology .03

FIRST MICROPHONE PRIORITY

When multiple microphones are active simultaneously in an audio conference phone, voice signals arrive at different microphones at different times due to the reflection of the sound from walls, ceilings or other surfaces. This causes sound distortion, which participants typically describe as a “hollow” or “tunnel” sound. ClearOne’s First Microphone Priority technology minimizes this distortion by using an intelligent voice detection method to activate only one microphone at a time based on its proximity to the person speaking.

PREMIUM CONFERENCING

RAV™

This complete audio conferencing system in a box delivers superior sound quality for stand-alone audio conferencing, and connects to video and web conferencing systems.

Over 3,000,000 conversations are estimated to take place on ClearOne products each year.

RAV (pronounced “rave”) is a revolutionary audio conferencing system that features sophisticated audio technologies found in ClearOne’s industry-leading professional product line, and is as easy to set up and use as our tabletop phones. RAV easily interfaces with any web and video conferencing system.

RAV 600

Includes an audio mixer with an integrated telephone interface and amplifier, two Bose® ceiling- or wall-mount speakers (or no speakers), a wireless or wired control unit, RAV-Ware™ software, and two RAV microphone pods comprised of three microphones each. The system also includes Ethernet control for remote management and configuration capabilities.

RAV 900

Includes all the features of the RAV 600, plus it adds an extra microphone pod to deliver optimal voice pickup in larger rooms.

TABLE DIAGRAMS

The recommended distance between the mic pods and each participant is between 4 and 12 feet, depending on room conditions. Background noise, reflective hard surfaces and the number of participants may affect the pick-up range.

USAGE PROFILES

RAV 600	• Medium-sized conference rooms
	• Executive offices
	• Existing room structures - no complex wiring or installation required
	• Rooms requiring interface with rich-media systems:
	  • Video conferencing system
	  • Web conferencing system
	  • IP telephony system/handset
	  • Computer sound card (for amplifying PC audio in the room)
	• Conference rooms with evolving needs - use audio now, add video or web later
	• Connect with any audio conference device on the far end - experience high quality sound for both send and receive - no wideband required
	• Interface with AMX and Crestron control systems
	• Add audio conferencing functionality to existing in-room sound systems, or use RAV's amplifier and speakers
	• Manage system remotely via Ethernet connection

RAV 900	• Same scenarios as RAV 600 • For larger rooms (9 mics included)

Premium

ClearOne Technology .04

ADAPTIVE MODELING

In any conferencing environment, a number of factors can cause changes in the room's ambient noise level, including the HVAC system cycling on and off, an increase or decrease in the number of people in the room, changes in seating arrangements and other similar acoustical events. These events can cause a variety of audio problems, such as feedback and residual echo. Adaptive Modeling monitors key acoustical elements to predict and adapt to such changes, ensuring high quality audio, regardless of varying room dynamics.

CONFERENCING MICROPHONES

AccuMic®

The AccuMic VC and PC are true plug-and-play echo and noise canceling microphones that provide superior audio pickup for video and PC-based conferencing.

How many great ideas are lost because of half-duplex audio performance and noise? ClearOne helps you realize what it's like to really connect.

Utilizing ClearOne's sophisticated audio processing technologies, AccuMic VC and PC echo and noise canceling microphones connect to video and web conferencing systems to provide superior audio pickup. They can daisy chain up to two units to provide expanded coverage for larger rooms.

AccuMic VC

Connects directly to any set-top video conferencing system to enhance and extend microphone coverage in small rooms. It can also easily be expanded for larger rooms by adding a second AccuMic.

AccuMic PC

Easily connects to a PC or Mac to enhance the audio quality in any type of computer-based conferencing, including use with soft phones and web conferencing. Like AccuMic VC, it can also easily be expanded for larger rooms by adding a second AccuMic.

ROOM APPLICATIONS

The recommended distance between the mic pods and each participant is between 4 and 12 feet, depending on room conditions. Background noise, reflective hard surfaces and the number of participants may affect the pick-up range.

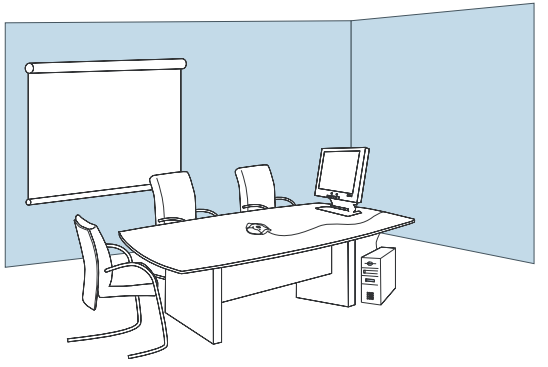
910-157-010



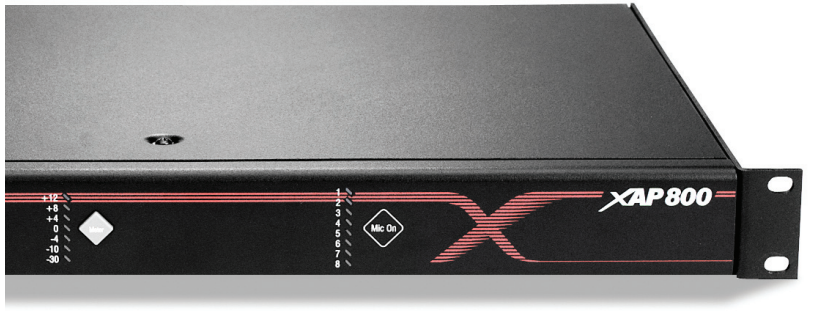
USAGE PROFILES

AccuMic VC	• Small conference rooms with existing set-top video conferencing system • Larger conference rooms (with addition of second AccuMic VC) • Improve microphone coverage so far-end participants hear clearly
AccuMic PC	• Connect directly to personal computer in office or conference room • Larger conference rooms (with addition of second AccuMic PC) • Hands-free computer-based conferencing using WebEx®, Microsoft® Office Live Meeting, etc. • Conferencing with soft phone using Vonage, Skype, Cisco, Avaya, etc.

ClearOne Technology .05

NOISE CANCELLATION

Noise Cancellation stops ambient room noise from being picked up by the microphones on the conference phone. Examples of ambient noise sources include HVAC systems, laptop computers, projectors and fluorescent lights. Unlike competitive products which claim to have noise cancellation, ClearOne uses a spectral content analysis technique that discriminates a talker's voice from ambient noise and only applies noise cancellation to ambient noise sources. This allows the voice signal to pass to the far-end phone device with pristine sound quality.



PROFESSIONAL CONFERENCING

XAP®
Converge™ Pro
Converge
PSR

ClearOne's professional audio conferencing and sound reinforcement products are the most sophisticated, feature-rich systems on the market, offering unrivaled audio processing performance.

ClearOne professional audio conferencing solutions deliver the ultimate in voice clarity, which allows participants to speak and listen naturally anywhere in the conference room without shouting or straining to hear.

The Converge Pro series of next-generation professional audio conferencing products delivers a new level of unrivaled performance, flexibility, and manageability. These products build on the heritage of the worldwide market-leading XAP family.

CONVERGE PRO 880 › **NEW**
The successor to the market-leading XAP 800. It features unrivaled audio processing performance, integrated Ethernet & USB, simplified configuration software, and many other new features for conferencing and sound reinforcement applications.

CONVERGE PRO 840T › **NEW**
The successor to the market-leading XAP 400. It combines the features of the Converge Pro 880 with a single-line telephone interface and a 10-watt amplifier for stand-alone conferencing applications.

CONVERGE PRO 8i › **NEW**
New input-only platform. Adds 8 more inputs to Converge Pro systems at a lower price, allowing customers to match the number of inputs and outputs required.

CONVERGE PRO TH20 › **NEW**
The successor to the XAP TH2. It adds telephone conferencing capabilities to the Converge Pro 880, and also adds two additional line-level inputs and outputs.

TABLETOP CONTROLLER FOR CONVERGE PRO › **NEW**
An affordable controller for ClearOne's Converge Pro platform. The Tabletop Controller gives Converge Pro users the ability to easily start and navigate an audio conference without the need for expensive touch panel control systems. Offers five user-definable keys to manage the most commonly used audio conference and presentation control functions.

ClearOne solutions can be found in offices, boardrooms, training centers, hotels, courtrooms, and auditoriums around worldwide.

XAP's unmatched audio performance has earned it the distinction as the undisputed leading choice for boardrooms, convention centers, distance learning facilities, courtrooms and other multi-use conference rooms. This scalable solution enables superior audio conferencing performance in medium to large environments.

XAP 800

The ultimate audio management platform for conferencing and sound reinforcement applications. It delivers market-leading audio processing performance for large-scale, installed audio systems.

XAP 400

Combines the features of the XAP 800 (with fewer inputs and ouputs), and adds a single-line telephone interface and a 10W amplifier to create a stand-alone teleconferencing system.

XAP TH2

Adds telephone conferencing capabilities to the XAP 800. Link multiple XAP TH2 units to conference additional phone lines.

TABLETOP CONTROLLER FOR XAP

An affordable controller for ClearOne's XAP platform. The Tabletop Controller gives XAP users the ability to easily start and navigate an audio conference without the need for expensive touch panel control systems. Offers five user-definable keys to manage the most commonly used audio conference and presentation control functions.

XAP NET

An advanced control interface for ClearOne's industry-leading professional conferencing line. The XAP Net brings Ethernet connectivity to XAP and PSR1212 audio systems, allowing remote programming, upgrades, and diagnostic functions.

CONVERGE 560/590

An easy-to-use conferencing system with flexible microphone and speaker options. Converge 560 and 590 deliver exceptional audio conferencing quality and value at a price point far superior to the competition. Innovative microphone distribution boxes, plus the ability to connect to rich-media systems, allow great flexibility in a wide variety of medium-sized room applications.

GT1524

A single-channel echo canceller. The GT1524 provides the highest possible audio quality available in a single-channel echo canceller and features a telephone interface to turn existing audio systems into a cost-effective teleconferencing system. Its simultaneous two-wire/four-wire operation allows for simultaneous audio and video conferencing.

PSR1212

A highly-advanced 12 x 12 digital matrix mixer featuring ClearOne's sophisticated audio processing technologies. The PSR1212 provides microphone mixing and routing, and is the ideal solution for sound reinforcement and room combining applications in a wide variety of venues.

PROFESSIONAL CONFERENCING MICROPHONES

A variety of high-performance mics for installed applications. The button mic installs directly into conference rooms tables, and is available in omni- or uni-directional versions. The tabletop microphone is a low-profile boundary mic that can be easily placed in the optimal location. The Delta microphone combines three tabletop microphones for 360-degree coverage.

USAGE PROFILES

CONVERGE PRO 880 & XAP 800	• Large-scale conferencing venues, such as board rooms, courtrooms, distance learning facilities, hotel and convention centers, training rooms, telemedicine facilities and houses of worship • Integration of various multimedia systems, such as control systems, video conferencing, in-room sound amplification, video and audio playback and recording, etc.
CONVERGE PRO TH20 & XAP TH2	• Add telephone conferencing capabilities to Converge Pro or XAP products
CONVERGE PRO 840T & XAP 400	• Same usage as Converge Pro 880 or XAP 800, but add telephone conferencing capabilities and amplifier, with fewer inputs and outputs
CONVERGE PRO 8i	• Add 8 mic/line inputs and 4 line inputs to a Converge Pro system in situations where additional inputs are required without adding extra output channels
TABLETOP CONTROLLER	• Add affordable controller solution to Converge Pro or XAP • Use for easy dialing of audio conference calls • Programmable keys allow for control of audio conference and presentation control functions
XAP NET	• Add ethernet connectivity to XAP systems • Not required for Converge Pro products, which include built-in Ethernet
PSR1212	• In-room sound amplification • Hotels and convention centers, auditoriums, stadiums, conference rooms, houses of worship and theaters
CONVERGE 560/590	• Medium-sized conferencing venues requiring up to 6 microphones (Converge 560) or up to 9 microphones (Converge 590), such as conference rooms, board rooms, distance learning facilities, training rooms and hearing/deposition rooms • Integration of multimedia systems, such as video conferencing, web conferencing, control systems, video and audio playback and recording, etc. • Rooms requiring in-room sound amplification

ADDITIONAL CLEARONE PRODUCTS

CONFERENCING FURNITURE

In addition to a complete line of audio conferencing products, ClearOne also offers an impressive line of conferencing furniture.

CONFERENCING FURNITURE
